

ĐỀ KIỂM TRA ĐÁNH GIÁ HỌC KỲ II (NĂM HỌC 2024 - 2025)

I. MULTIPLE CHOICE (CHOOSE A, B, C OR D) (3.5 PTS)

1. Yuri Gagarin was the first human to _____ into outer space in 1961.
A. travel B. traveling C. traveled D. travels
2. Astronauts in space live in conditions of _____ gravity.
A. micro B. microgravity C. zero D. floating
3. The man _____ car was stolen yesterday reported the crime to the local police.
A. who B. whom C. whose D. which
4. If I _____ a scholarship to study abroad, I would go to Australia to study environmental science.
A. win B. won C. have won D. will win
5. - "Could you tell me the way to the science museum?" - "_____."
A. Go straight ahead and turn left. B. It's very expensive. C. Yes, I am. D. Don't mention it.
6. Choose the word with a different stress pattern:
A. galaxy B. telescope C. astronaut D. environment
7. English has borrowed many words from other languages, _____ makes its vocabulary rich and diverse.
A. that B. which C. who D. where

II. SIGNS AND NOTICES (1.0 PT)

8. What does this notice mean?

[CAUTION: WET FLOOR - WATCH YOUR STEP]

- A. The floor is slippery, so walk carefully. B. You can run on this floor.
C. Water drinking area. D. No shoes allowed.
9. What does this notice mean?

[NO CELL PHONES DURING THE EXAMINATION]

- A. You can use your phone quietly. B. Candidates must switch off and not use phones during the exam.

C. Free wifi during the exam.

D. Buy phone cards here.

III. READING COMPREHENSION (3.0 PTS)

Space exploration has always fascinated humankind. Since the historic Apollo 11 mission in 1969 when Neil Armstrong became the first person to walk on the Moon, scientists have achieved numerous breakthroughs in astronomy and aerospace technology. Today, space agencies worldwide are planning ambitious missions to send humans to Mars and establish permanent lunar bases. Exploring space not only expands our understanding of the universe but also brings practical benefits to life on Earth. Many technologies initially developed for space missions—such as satellite communications, GPS navigation, water purification systems, and solar panels—are now widely used in daily life.

10. Neil Armstrong was the first person to step on the Moon. → **TRUE / FALSE**

11. GPS navigation was developed independently without any connection to space technology. → **TRUE / FALSE**

12. Scientists are currently planning human missions to Mars. → **TRUE / FALSE**

13. Space exploration brings zero practical benefits to life on Earth. → **TRUE / FALSE**

14. What is the main message of the text?

A. The life story of Neil Armstrong.

B. The achievements and real-world benefits of space exploration.

C. Difficulties astronauts face in zero gravity.

D. The cost of building rockets.

IV. WORD FORMATION (1.5 PTS)

15. Becoming an astronaut requires excellent physical _____. (FIT)

16. The discovery of water on Mars was a _____ scientific achievement. (REMARK)

17. Scientists are looking for signs of life in _____ solar systems. (DISTANT)

V. SENTENCE REWRITE (1.0 PT)

18. I don't have enough qualifications, so I cannot apply for this job.

→ If I had _____.

19. The girl is my classmate. You met her at the science exhibition yesterday.

→ The girl whom _____.

--- THE END / HẾT ---
